

DIGESTER GDL

Digester GDL is a liquid concentrated product which is easily diluted and used in a variety of wastewater treatment systems to alleviate challenges associated with fats, oils and grease (FOG), sludge, odour and hydrogen sulphide

Active Ingredients	<i>Bacillus bacteria</i>
Concentration	<i>250 Million CFU/ml</i>
Physical Properties	<i>From: Liquid Colour: Opaque Naturally fragranced</i>
Packaging	<i>5L Can 25L Jerry Can 200L Drum 1000L IBC</i>
Storage and Handling	<i>Dry and cool Keep container closed tightly when not in use</i>
Shelf Life	<i>2 years</i>

APPLICATIONS

- Lagoons
- Aeration Basins
- Force Mains
- Grease Interceptors
- Lift Stations
- Activated sludge systems

FEATURES

- Scientifically selected blend of *Bacillus* bacteria.
- Contains micronutrients essential for optimal growth
- Effective growth and treatment across temperature ranges.
- Stable two-year shelf life.
- Non-toxic.

DOSING

Contact our technical team for specific instructions and guidance for dilutions and dosing.

For specific dosing recommendations chat with our technical team and/or review the system application sheet. Typical dosing is based on flow and applied with a metering pump.
