

## BUGS IN A BOTTLE®

MICROBIAL WASTEWATER TREATMENT

# ODOUR PLUS

BUGS IN A BOTTLE® ODOUR PLUS is a liquid bacterial concentrate which combines unique essential oil chemistry and application specific bacteria to offer a proven, innovative and effective long-term approach to odour control..

### APPLICATIONS

- Grey water treatment.
- Piggeries and poultry.
- Livestock pens, pet cages and artificial turf.
- Agriculture production facilities.
- Mortality pits and settlement dams.
- Disaster remediation.
- Highly effective against spoiled food, fish, cigarette smoke and other odourous compounds.

### FEATURES

- Liquid product designed to tackle odours via a multi-pronged approach, using a combination of essential oils and microbiology.
- Essential oil based counteractants binds malodours and prevents the nose from detecting them, provides immediate odour neutralising.
- Next, the bacillus microbes consortium dgrades a wide range of odour causing compounds such as Amines, volatile fatty acids and sulphur containing organics.
- Can be used to improve waste and wastewater treatment plant performance to meet emission directives.

### DOSING

- The product can be dosed as a neat liquid directly into the grey water or other liquid retention tank at a ratio of 500ml per 100L.
- Or, the product can be diluted up to 1 to 25 in clean water and sprayed over the surface or into the air.
- The product is highly effective when dosed via a misting or nebulising system around the area of concern or the site perimeter.
- Dilution rate can be adjusted depending on the severity of the problem.

#### Active Ingredients:

Bacillus bacteria

#### Concentration:

7e8 CFU/ml

#### Physical Properties:

Opaque white turbid liquid

#### Packaging:

1L, 5L & 25L bulk cans

#### Storage and Handling:

Dry and cool  
Keep container closed tightly when not in use

#### Shelf Life:

12 months unopened
