

DIGESTER FOG

Digester FOG is a complete, robust product used in a variety of wastewater treatment systems to alleviate challenges associated with FOG, sludge, odour and hydrocarbons.

Active Ingredients	<i>Bacillus bacteria</i>
Concentration	<i>1 Billion CFU/g or 4 Billion CFU/g</i>
Physical Properties	<i>From: Powder Colour: Tan Odourless</i>
Packaging	<i>Bulk: 5kg Bucket 25kg Bucket WSP: 10kg (50 x 200g) (water soluble sachet)</i>
Storage and Handling	<i>Dry and cool Keep container closed tightly when not in use</i>
Shelf Life	<i>2 years</i>

APPLICATIONS

- Lagoons.
- Grease traps.
- Collection systems.
- Any application where hydrocarbons are prevalent.

FEATURES

- Scientifically selected blend of *Bacillus* bacteria.
- Contains micronutrients essential for optimal microbial growth.
- Effective growth and treatment across temperature ranges.
- Packaged in easy to use water soluble sachets.
- Stable two-year shelf life.
- All natural and non-toxic.

DOSING

For specific dosing recommendations, speak to our technical team and/or review the system application sheet. The typical dose is between 0.5-5mg/L of system flow, depending on system design and loading method.

For certain applications, the product can be hydrated in potable water at a ratio of 1:10 for 1-8 hours. Then poured into the designated dosing location. If the situation does not allow for hydration the product can be applied directly.
